

Mr. Wilson's S.S. 9
Great Minds of the Scientific Revolution

A good place to start is by using the [World Book database](#), because it gives you an introduction to your topic. It also provides you with links to videos, primary sources and articles.

Then take a look at the "[Alternative Search Engines](#)" page on the library website. We tend to "google" everything, but even though Google is effective most of the time, your search can be more streamlined if you check out some other search engines.

For all of the "Great Minds" whom you will be researching, the following websites provide good information, but do not limit yourself to these:

General information and links to other resources

[Wikipedia](#)

[PBS](#)

[Starchild – NASA](#)

[Wolfram Research](#)

[BBC](#)

[Yahoo! Kids](#)

Antonie Philips van Leeuwenhoek
[Antonie Philips van Leeuwenhoek](#)
[Antonie Philips van Leeuwenhoek](#)

Andreas Vesalius
[Historical Anatomies on the Web](#)
[Britannica](#)
[University of Glasgow](#)

A couple of things to remember:

1. If you are going to use an image from a website, please include the link either below the photo, or else hyperlink it, so that you have attributed that image to the correct source.
2. In order to create your bibliography, you might want to use some of the citation generators found on the "[Citation Tools](#)" page of the library website. It will make your life MUCH easier.
